What is the leverage of the Trading Account?

Trading · https://idwindsorbrokers.com/knowledge-base/trading/what-is-the-leverage-of-the-trading-account/

The default Leverage is 1:1000 (depending on the entity, please refer to the dynamic leverage page here). The default leverage applied by the company is 1:1000 (depending on the entity, please refer to the dynamic leverage page here , however you have the ability of requesting different leverage.

The company applies Dynamic Leverage; Dynamic Leverage is a risk management tool that aims to minimize risks deriving from high volume trading since leverage is based per instrument by tiers instead of per account. In particular, margin requirements are set per symbol and automatically adapt in cases where the net number of lots on open positions increases or decreases in the client's account. This is done per trading instrument.

More information on how the Company applies dynamic leverage, including, the maximum leverage offered by the Company per symbol asset classis available under "Dynamic Leverage" on our website
